Not all associate's degree programs of study are offered at all ITT Technical Institute locations. Not all ITT Technical Institute locations offer bachelor's degree programs of study and not all bachelor's degree programs of study are offered at all ITT Technical Institute locations that offer bachelor's degree programs. The master's degree program in business administration is an online program of study. Please refer to the Curricula section of the school catalog of the particular ITT Technical Institute location for a complete listing of the programs of study offered at that ITT Technical Institute location and the method of delivery for each of those programs (i.e., taught in residence at the ITT Technical Institute location, online over the Internet as a distance education program or partially in residence and partially online).

All online programs of study are offered through the ITT Technical Institute location at 9511 Angola Court, Indianapolis, IN 46268 (IN AC-0148 OH Reg. No 01-12-1614T).

- (1) This is an estimate of the total tuition that will be charged for a student to complete the program of study within the Normal Time of that program of study. This assumes that the student will:
- begin the program of study in the Fall academic quarter in 2015;
  - take a full-time course load each academic quarter until the student graduates from the program of study, unless the number of credits required to graduate from the program in the student's last academic quarter of attendance is less than a full-time course load, in which case the student is assumed to take all of the courses containing all of the remaining credits required to graduate during that last academic quarter;
  - not transfer in, or test out of, any credits;
  - successfully complete each course in the program of study and make satisfactory academic progress through graduation from the program of study; and
  - take only those courses required to graduate from the program of study and not repeat, withdraw from or fail any of those courses.

The ITT Technical Institute may, at any time in its discretion, revise the curriculum content of the program of study or any course in the program of study and change the number of credit hours in the program of study or in any course in the program of study. The tuition for each program course that a student is registered to take from the ITT Technical Institute is determined by multiplying the tuition per credit hour by the number of credit hours in the program course. The tuition for each academic quarter in which a student is enrolled in a program of study offered by ITT Technical Institute is determined by multiplying the tuition per credit hour by the total number of credit hours in all of the program courses that the student is registered to take during the academic quarter. The tuition for the entire program of study in which a student is enrolled is determined by multiplying the tuition per credit hour by the total number of credit hours in all of the courses in that program of study. The tuition for all of the credit hours in all of the program courses that a student is registered to take from ITT Technical Institute during an academic quarter is due and payable by the student to ITT Technical Institute on the first day of that quarter. The estimated tuition assumes that a student will begin the program of study in the Fall academic quarter in 2015 and will take three courses in each academic quarter throughout the length of the program of study based on the following tuition per credit hour:

- \$493 per credit hour for residence programs except those offered in the state of New Mexico;
- \$529 per credit hour for residence programs offered in the state of New Mexico; and
- \$426 per credit hour for online undergraduate programs and \$464 for online graduate program.

Certain states require completion of a varying number of program credit hours. Refer to State Specific Tuition for program tuition for the following states as of date of publication: AR, GA, IL, MD, MN and OH.

- (2) This is an estimate of the total fees that will be charged for a student to complete the program of study within the Normal Time of the program of study at most ITT Technical Institute locations. This assumes that the student does not withdraw from his or her program of study. Fees vary in some states. Refer to Fees Table for fees charged in each program as of July 1, 2015, at each ITT Technical Institute location.
- (3) This is an estimate of the cost, as of July 1, 2015, of the tools required for the program of study, if purchased from ITT Technical Institute. The actual use of, and instruction regarding, the tools in any program course may vary depending on the program course and any changes thereto, the faculty member teaching the program course and the student's progress in the program course. This amount assumes that the courses that the student chooses to take to satisfy any unspecified core course requirements in the program of study do not require the purchase of any tools for use in those courses. The estimated cost of those tools is subject to change by ITT Technical Institute at any time. No student is obligated to purchase any tools from ITT Technical Institute. Any tools that a student purchases from ITT Technical Institute are unreturnable and the cost is nonrefundable, except as expressly specified in the Return of Tools section in the particular school catalog of the ITT Technical Institute location attended by the student. The cost of any tools that a student purchases from ITT Technical Institute is due and payable by the student to ITT Technical Institute upon the student's receipt of those tools. The Tools cost for the associate degree in Nursing program offered in the state of Michigan is \$700.
- (4) The associate degree Nursing Program tuition varies by location based upon program credit hours required for completion. Refer to Nursing Program Tuition.

The Academic Fee is due and payable by the student to ITT Technical Institute on the student's first day of recorded attendance in any program course following the student's enrollment in a program of study offered by ITT Technical Institute. The Administrative Fee is due and payable by the student to ITT Technical Institute immediately upon the termination of the student's enrollment in the program of study.

(1) A STRF Fee is assessed against Student on the first day of recorded attendance in any Program course based on (a) the estimated total charges for the entire Program, including the amount of estimated tuition and any other fees charged to Student and (b) the estimated cost of any tools that Student purchases from the School for any Program course that Student is registered to take during the entire Program. The amount of the STRF Fee is \$0.00 per \$1,000 of estimated total charges for the entire Program (rounded to the nearest \$1,000) charged to Student. Student will pay the School the STRF Fee assessed against Student on the first day of recorded attendance in any Program course. The STRF Fee is nonrefundable.
